

-Bullseye- 50

LASER MEASURER

The latest in laser distance technology, the Bullseye 50 incorporates a patented side operating measuring button for ease of use and greater efficiency.

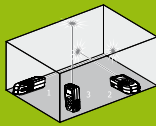

Kit Inclusions

- Silica gel protector
- Belt Pouch
- Safety Strap

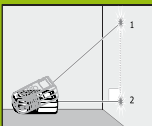

Bullseye button

The Bullseye button enables the user to measure with more flexibility, accuracy and efficiency.

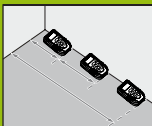

Room calculation

The Bullseye 50 comes with 2 programs to calculate both area and volume. By simply pressing the control button you can switch easily between programs.

Pythagoras Measurement

Using the Pythagoras function you can now record indirect height and length measurements with the touch of a button.

Tracking Measurement

Locate the distance and find the position from a reference point with the tracking (continuous) Measuring function.

Bullseye 50 Specifications 008-10BES0

Measure range*	.5m – 50m
Accuracy*	+/-2mm @30m
Measure speed	.5 sec
Laser type	650nm Class II
Battery	9v
Battery life	5000 measurements
Operating temp	0° – 40°C
Storage temp	-20° – 60°C
Auto switch off	Yes
Illuminated display	Yes
Dimensions	104 x 61 x 32mm

* Working range and accuracy dependent on light conditions and target surface.
